As a nurse, I have always valued lifelong learning. I appreciate the ability to help other help themselves through education and utilization of community resources. I have worked as an acute care nurse on Medical-Surgical units at FHN Memorial Hospital, Oncology Nurse and Clinical Research Coordinator at FHN's Leonard C. Ferguson Cancer Center, and as a long term care RN. I appreciate every role that I have had as a Registered Nurse. Assisting patients to meet their maximum potential is a top priority in my nursing career. As an educator, take pride in assisting students to enter the healthcare field.
