- Assignment grading, all elements (filename, grade, feedback comments) are one screen, also annotate over student submissions of different file types.
- Download selected assignments, select only the assignments you want to download for offline viewing.
- Easily restore deleted content, new RECYCLE BIN!
- Pinned forum discussions, pin forum posts, allowing them to always be on the top, making them more visible to students. Tick the box to 'pin' the discussion to the top of the list.
- Permalink for discussions, click the Permalink in the lower right of the window which can be copied and pasted elsewhere, providing easy access to a post.
- Workshop enhancements, now you can specify the types of file you want student to submit or not. Students can also delete their own submissions.
- Tag course activities, tagging makes it simpler to find related content
- Easier section editing, now change section titles without leaving the page! Click on the pencil icon, rename the section, click the Edit menu to edit the description and other settings.

Commented [jmi1]: https://docs.moodle.org/31/en/Assignment_activity, try offline grading worksheet, "gives the teacher a link to download the grading list as a spreadsheet. They will then be able to enter grades and feedback comments offline and then re-upload the sheet. See Using Assignment for more information. Feedback files allows graders to upload files with feedback when marking. These files may be the marked up student assignments, documents with comments, a completed marking guide, or spoken audio feedback.
